

## Percentage of adults in each state who live in a household with at least one gun

CBSNews.com\* ranking based on a RAND Corp. April 2020 study (Figure 2)

\* According to the [CBSNews.com "Gun ownership by state" slideshow](#) on July 23, 2020: "In April 2020, the [RAND Corporation published a long-term study](#) tracking gun ownership in all 50 states, from 1980 to 2016. They combined survey-based estimates with other data indicative of gun ownership — shooting death records, gun-related magazine subscriptions, background check submissions and more — to determine the percentage of adults in each state who live in a household with at least one gun. We've ranked the states by those percentages."
